Welcome to San Diego State University and to the College of Arts and Letters

As you begin settling into college life here at San Diego State University I hope you will consider getting involved around campus. Getting involved will help you find your campus niche and make new friends who share your interests. SDSU and the College of Arts & Letters (CAL) both offer several ways for you to do this. As you look over your options, I hope you will also consider being a part of CAL Council. This council is made up of student representatives from the student organizations under CAL as well as CAL Representatives to the Associated Students (AS) Council. By being a part of our council, students are informed about what is going on in CAL, as well as what is going on in AS and around campus. I sincerely hope you will consider joining us because the more student participation, the better we can accurately represent CAL Students. Our meetings will be every Monday at 10am in Aztec Mesa 105. Hope to see you there!

Sincerely,
College of Arts & Letters Student Council

THE COLLEGE OF ARTS AND LETTERS offers a wide variety of clubs and societies for students to join. These include social, academic and volunteer organizations. Participating in campus clubs creates an opportunity for networking with other people who share your interests. Students learn valuable leadership and teamwork skills, gain knowledge and experience in fields they are passionate about, and form friendships with their colleagues.

-----------------------------------------------
